

**POSITION:** ASSOCIATE ENERGY ANALYST, ENTRY-LEVEL

**Reports to:** Executive Vice President, ENE

**Position Overview:**

The position is responsible for supporting the day-to-day activities of Energy New England's wholesale power supply Operations team, managing load and generation throughout New England both the bilateral and New England spot markets. This position requires strong analytical and communications skills, and a willingness to develop an in-depth understanding of the energy markets.

**Key Objectives:**

- Analyze customer historical demand and develop load forecasts
- Develop reporting templates for both demand and supply
- Provide portfolio modeling and reporting support
- Analyze ISO New England forecast, operational and settlement market data and reports
- Understand ISO market rules and evaluate impacts to customers interests as load servers and generators
- Participate in regular market assessments and environmental trends that could affect our customer base and our growth strategies.

**Position Requirements:**

- BS degree in Engineering, Finance, Mathematics or appropriate discipline
- Expert capabilities with spreadsheets, Microsoft Office applications
- Econometric or financial modeling a plus
- Database programming ability and/or application development a plus

**Company Overview:**

Energy New England, LLC is a highly successful and profitable energy advisor to the wholesale and retail energy markets, serving the public power, independent power producer, higher education, and commercial and industrial end user communities. We are the largest energy risk management entity dedicated to public power in the Northeast. We are committed to serving as the preeminent strategic advisor and provider of solutions-based services in risk management, energy trading, energy efficiency, energy conservation and demand response at both the wholesale and retail levels. We are prudently expanding into new markets and aggressively developing new service offerings to further differentiate ourselves in the marketplace.

**Attributes:**

Individual who is ready to learn, take initiative, and contribute to a team whose activities cover the energy spectrum. This person should be comfortable performing multiple tasks and supporting a

variety of initiatives related to energy and supply management, portfolio modeling and optimization, risk and credit management, and renewable energy; a self-starter who is willing to learn the wholesale energy marketplace and has a proficiency in software applications and modeling. Ability to contribute in an entrepreneurial, small company environment.

We offer competitive salary and benefits programs, an entrepreneurial work environment and a supportive team structure. Interested? Please forward your resume, including salary history as appropriate, to:
